a
T1-early (local-trained)
b
T1-late (local-trained)
c
T2-dms (local-trained)
cosine with exact gradient
update
β, symmetric
no β, symmetric
β, random
no β, random
d
per-network correlation: T1-early r=0.22 [0.09,0.34]; T1-late r=0.28 [0.13,0.42]; T2-dms r=0.17 [0.10,0.23]
T1-early
T1-late
T2-dms
alignment gain from β
(cos with β - cos without)
adaptation loop gain |⟨g′⟩β̄| (Pyr cells)
e
filled: with β; open: without
row cosine, random feedback
Pyr
